Sistemi a battente

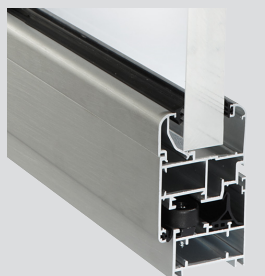

CONCEPT **65**

Sistema a taglio termico per serramenti di alta produttività con anta a scomparsa

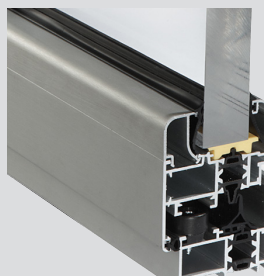

MATIC **50 TT** **62 TT** **72 HT**

Sistemi a taglio termico per serramenti con ferramenta perimetrale ed elevate prestazioni termiche ed acustiche

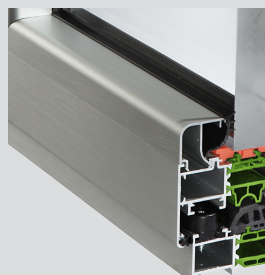

PLANET **45**

Sistema per serramenti non isolati a camera europea ad elevata ermeticità

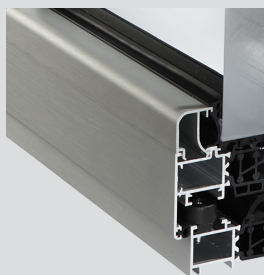

PLANET **50 TT**

Sistema per serramenti a camera europea con certificati acustici, termici e ambientali

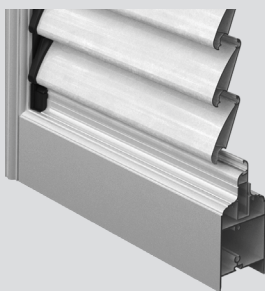

PLANET **62 TT** **neg 62**

Sistema a taglio termico prodotto in filiera certificata con eccellente tenuta aria/acqua/vento e ottimi valori di trasmittanza termica ed acustica

PLANET **72 HT**

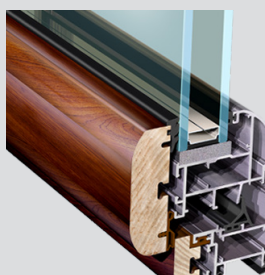

Sistema a taglio termico al top della gamma Planet con eccellenti valori termici, acustici e fisico meccanici

PLANET **45** *persiana* **VENERE PRO**

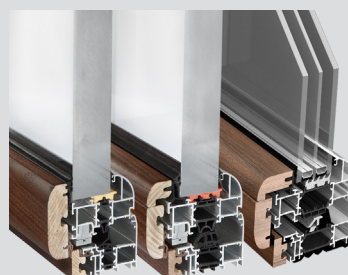

Persiane in alluminio a camera europea con sistema di tenuta a doppio battente ed esclusivo sistema orientabile Venere Pro

Sistemi a battente alluminio-legno

NATHURA **59**

Sistema alluminio/legno per serramenti non isolati ad elevata ermeticità

NATHURA **70** **82** **92**

Sistemi a taglio termico con ferramenta perimetrale ed elevatissime prestazioni di isolamento termico

Le caratteristiche tecniche, il design, la semplicità, la velocità di assemblaggio, la competitività e il servizio sono alla base del sistema SMART30. Sistema modulare componibile, costituito da profilati in alluminio con sezione da 30 mm. È il più indicato per le realizzazioni semplici e lineari quali: CHIUSURE (armadi a muro, dispense, cucine in muratura, centraline, contatori acqua-luce-gas, copricaldaie), ZANZARIERE, PORTE DI SERVIZIO, PARETI INTERNE, MOBILETTI E VETRINETTE.

The technical specifications, design, simplicity, the assembly speed, the competitiveness and service are at the base of SMART30 system.

Modular system consisting of aluminum profiles with a section of 30 mm.

It is the most suitable for simple and linear realizations such as: CLOSURES, MOSQUITO NETS, SERVICE DOORS, INTERIOR WALLS, CABINETS AND DISPLAY CASES.

per applicare gli accessori
ACP 3022 / ACP 3024

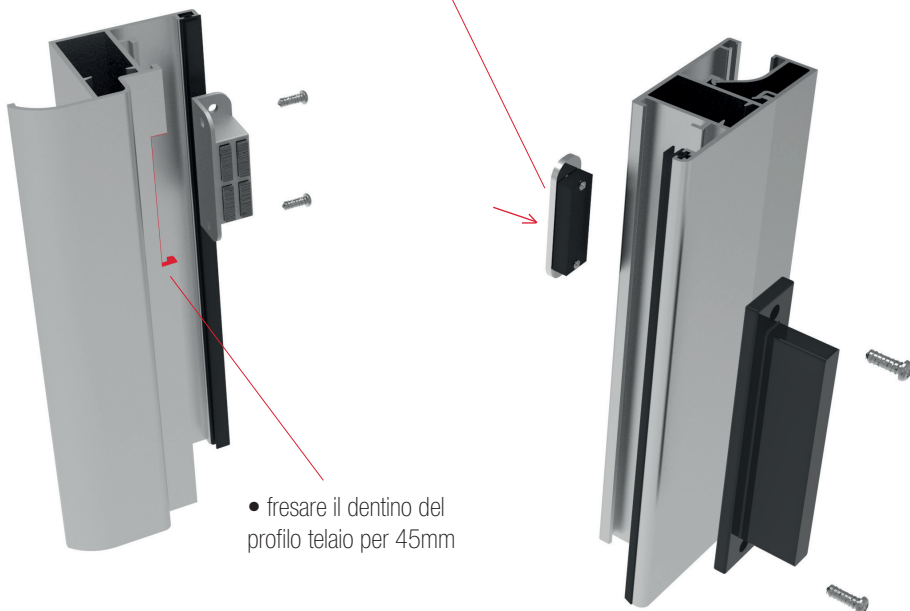

montaggio kit **ACP 3025**

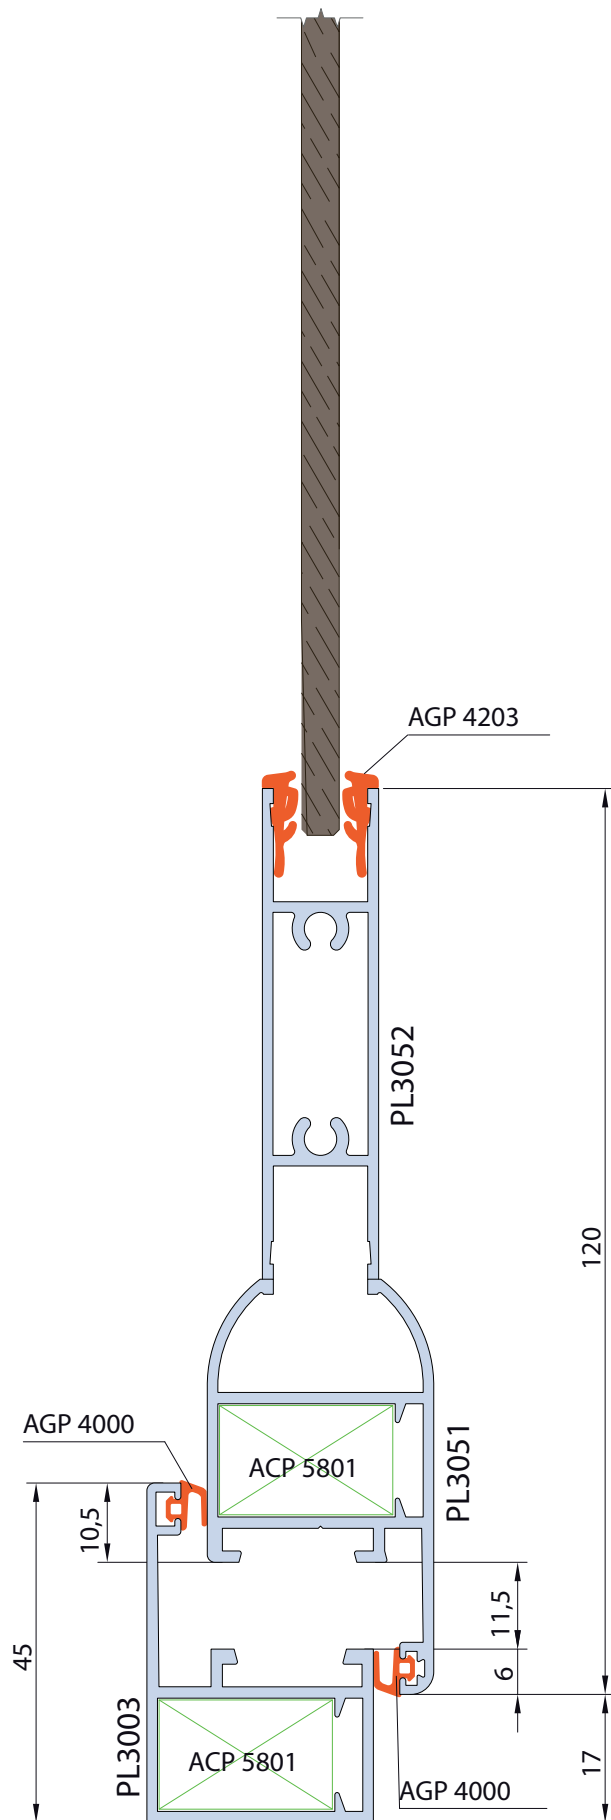

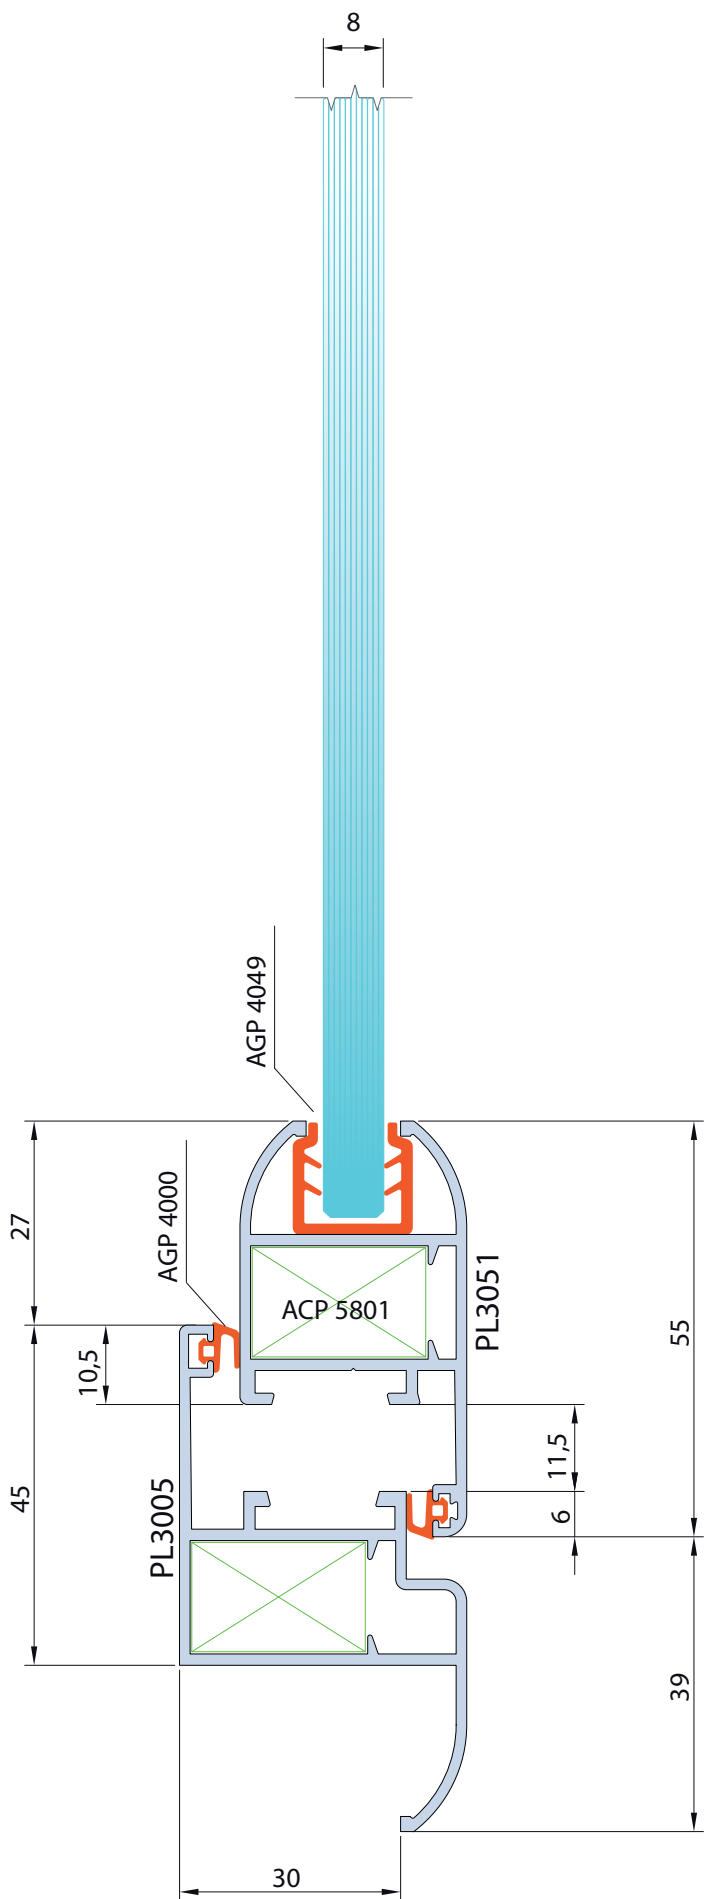

- avvitare il riscontro metallico su una piastrina 5x10x30mm (si può utilizzare uno spessore appogiovetro)

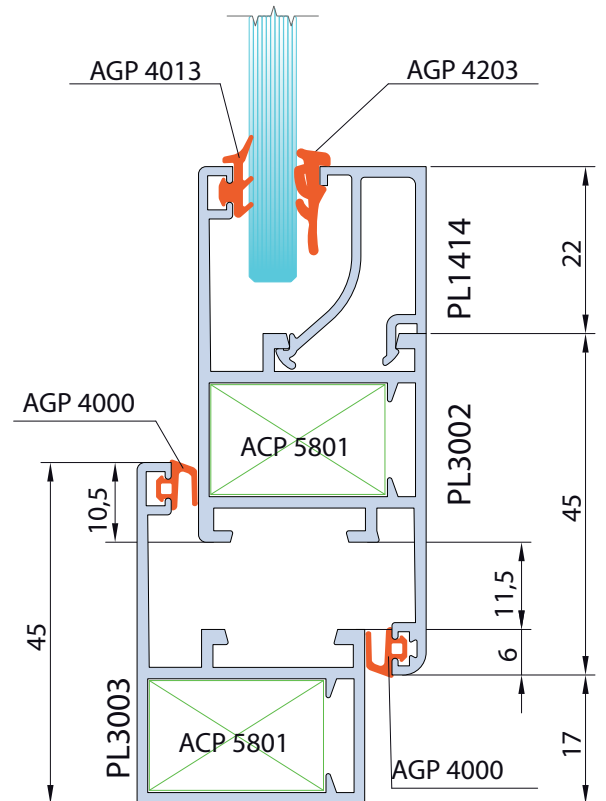

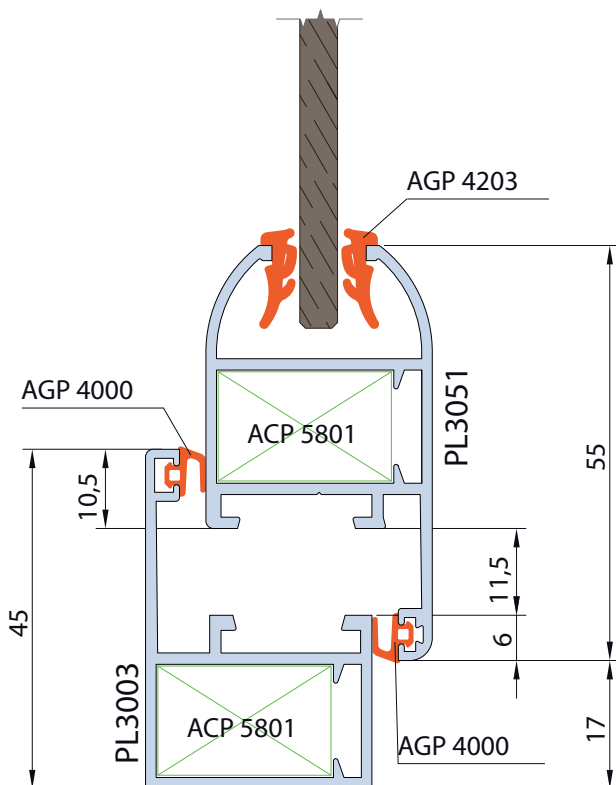

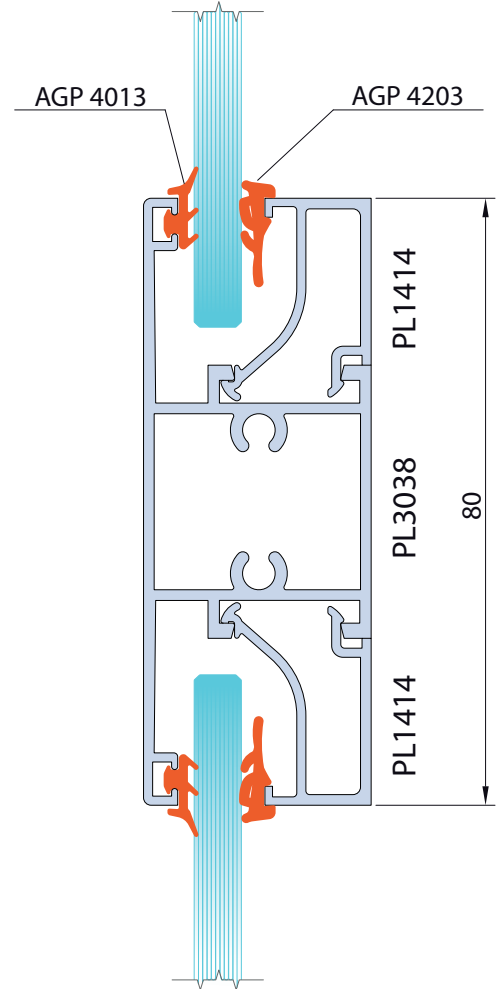

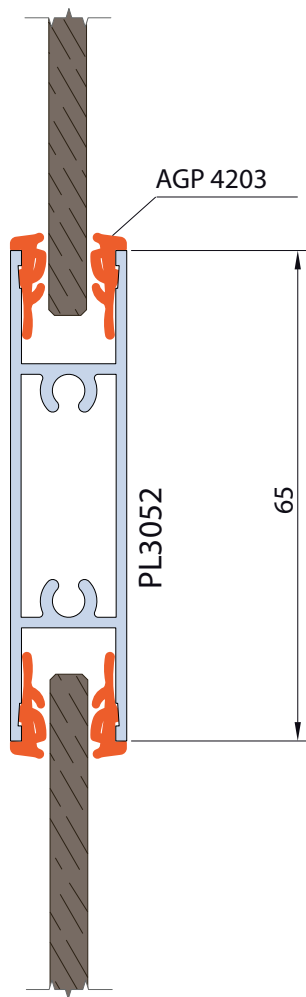

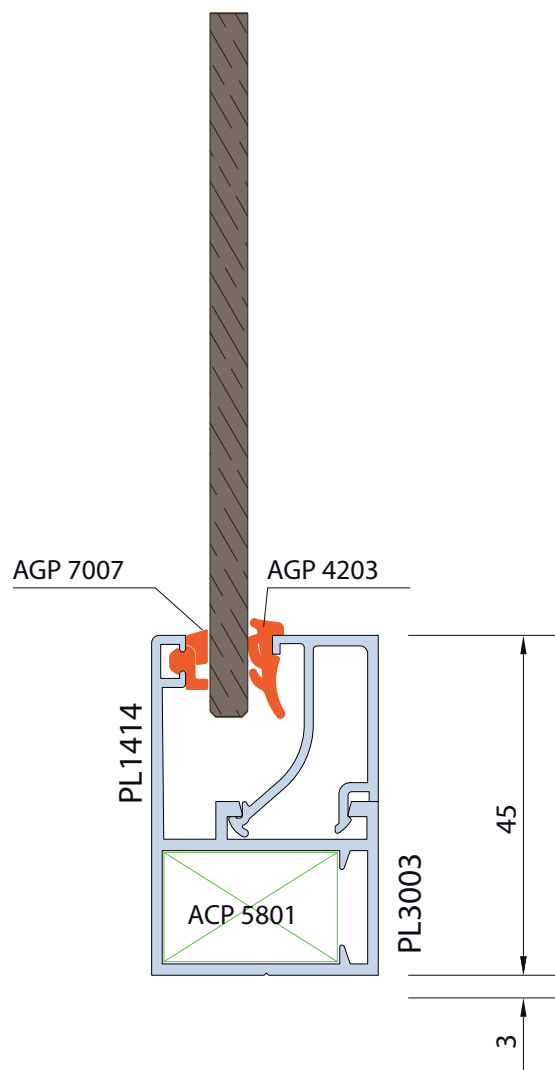

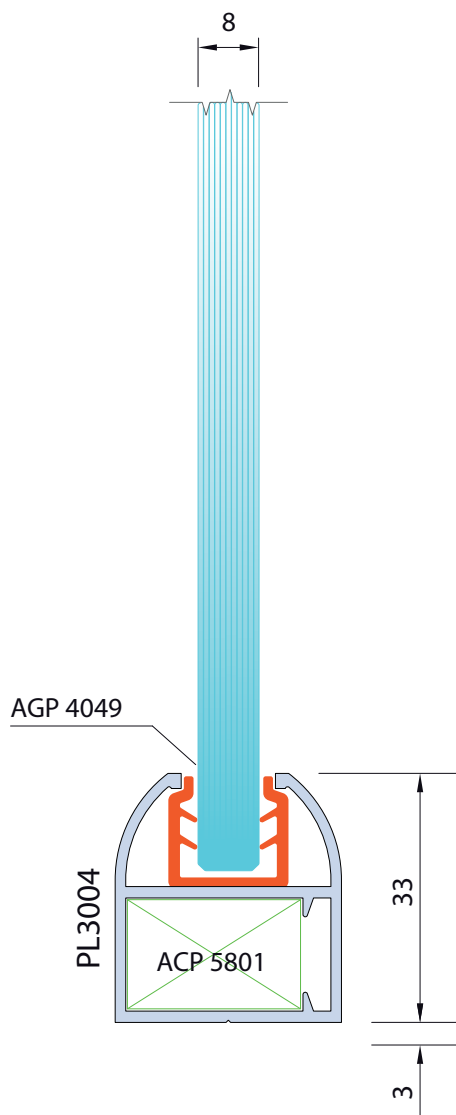

- fresare il dentino del profilo telaio per 45mm

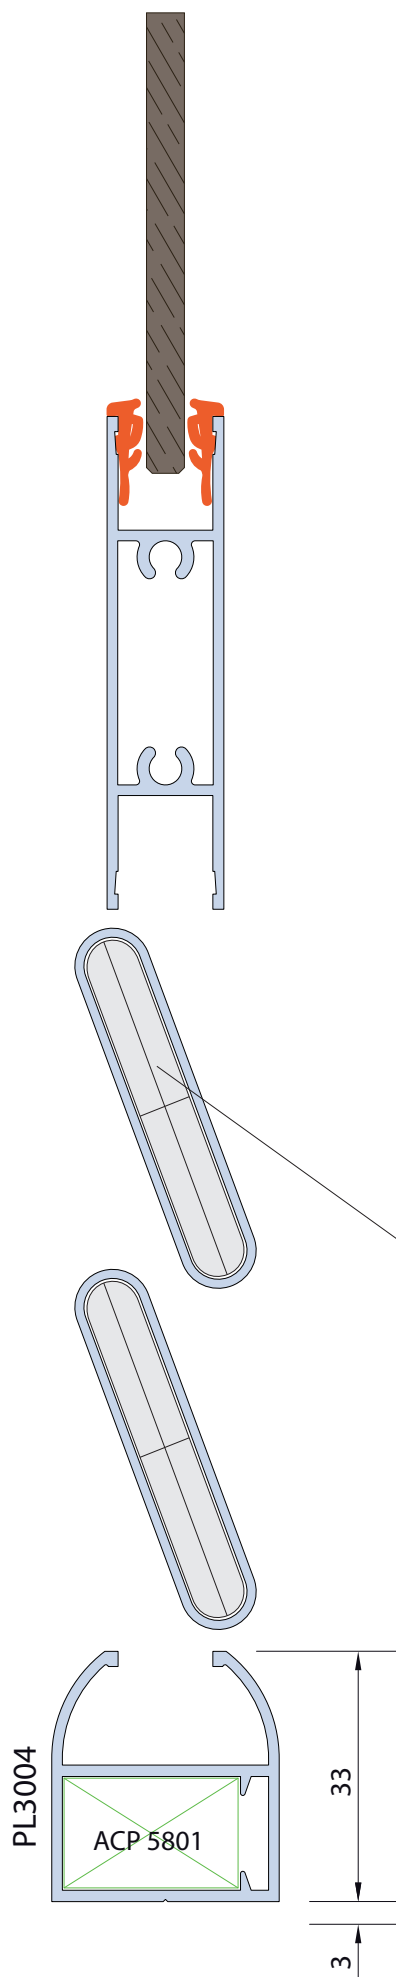

- avvitare la calamita come in figura (il magnete deve rimanere allineato al profilo)
- avvitare la maniglia dell'antina in corrispondenza del riscontro in modo da fissare la piastrina di plastica

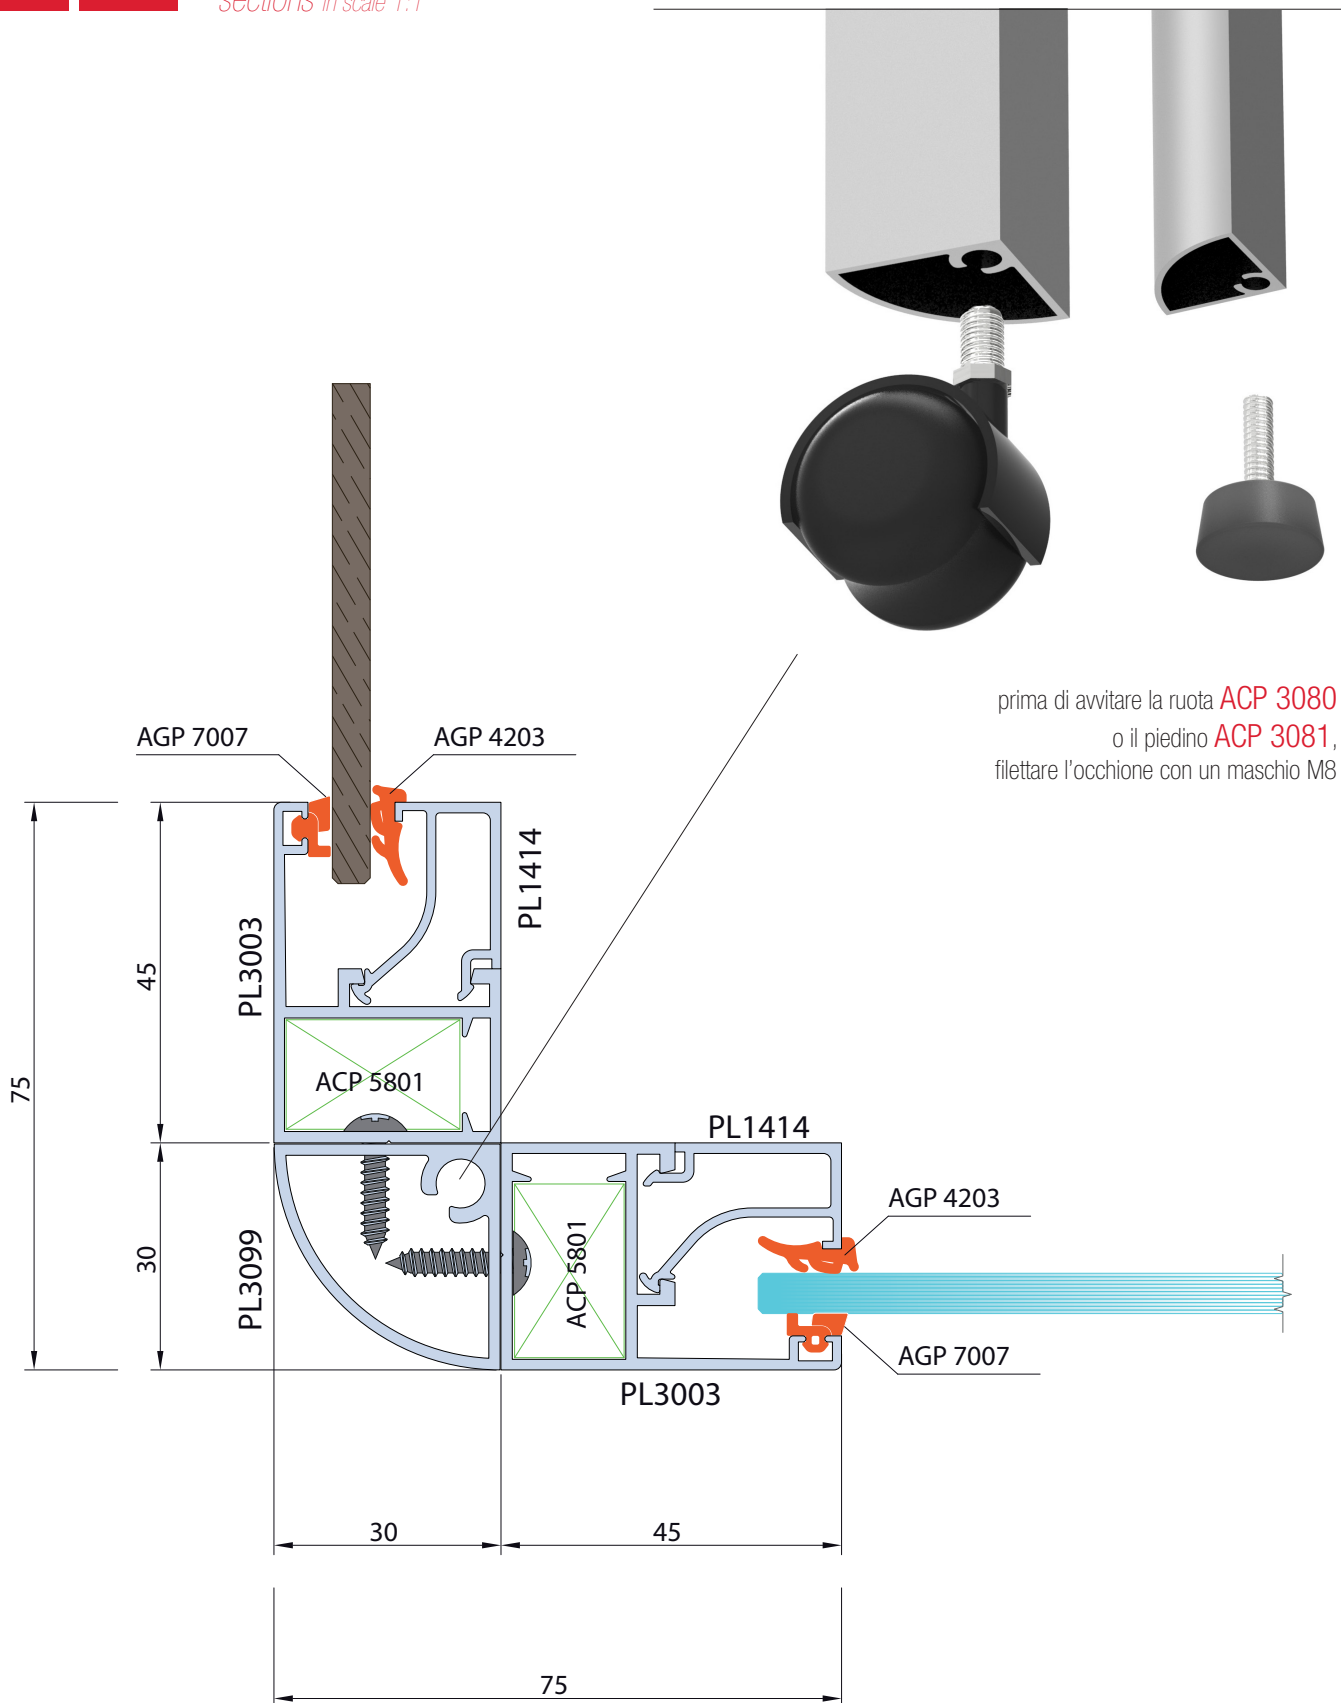

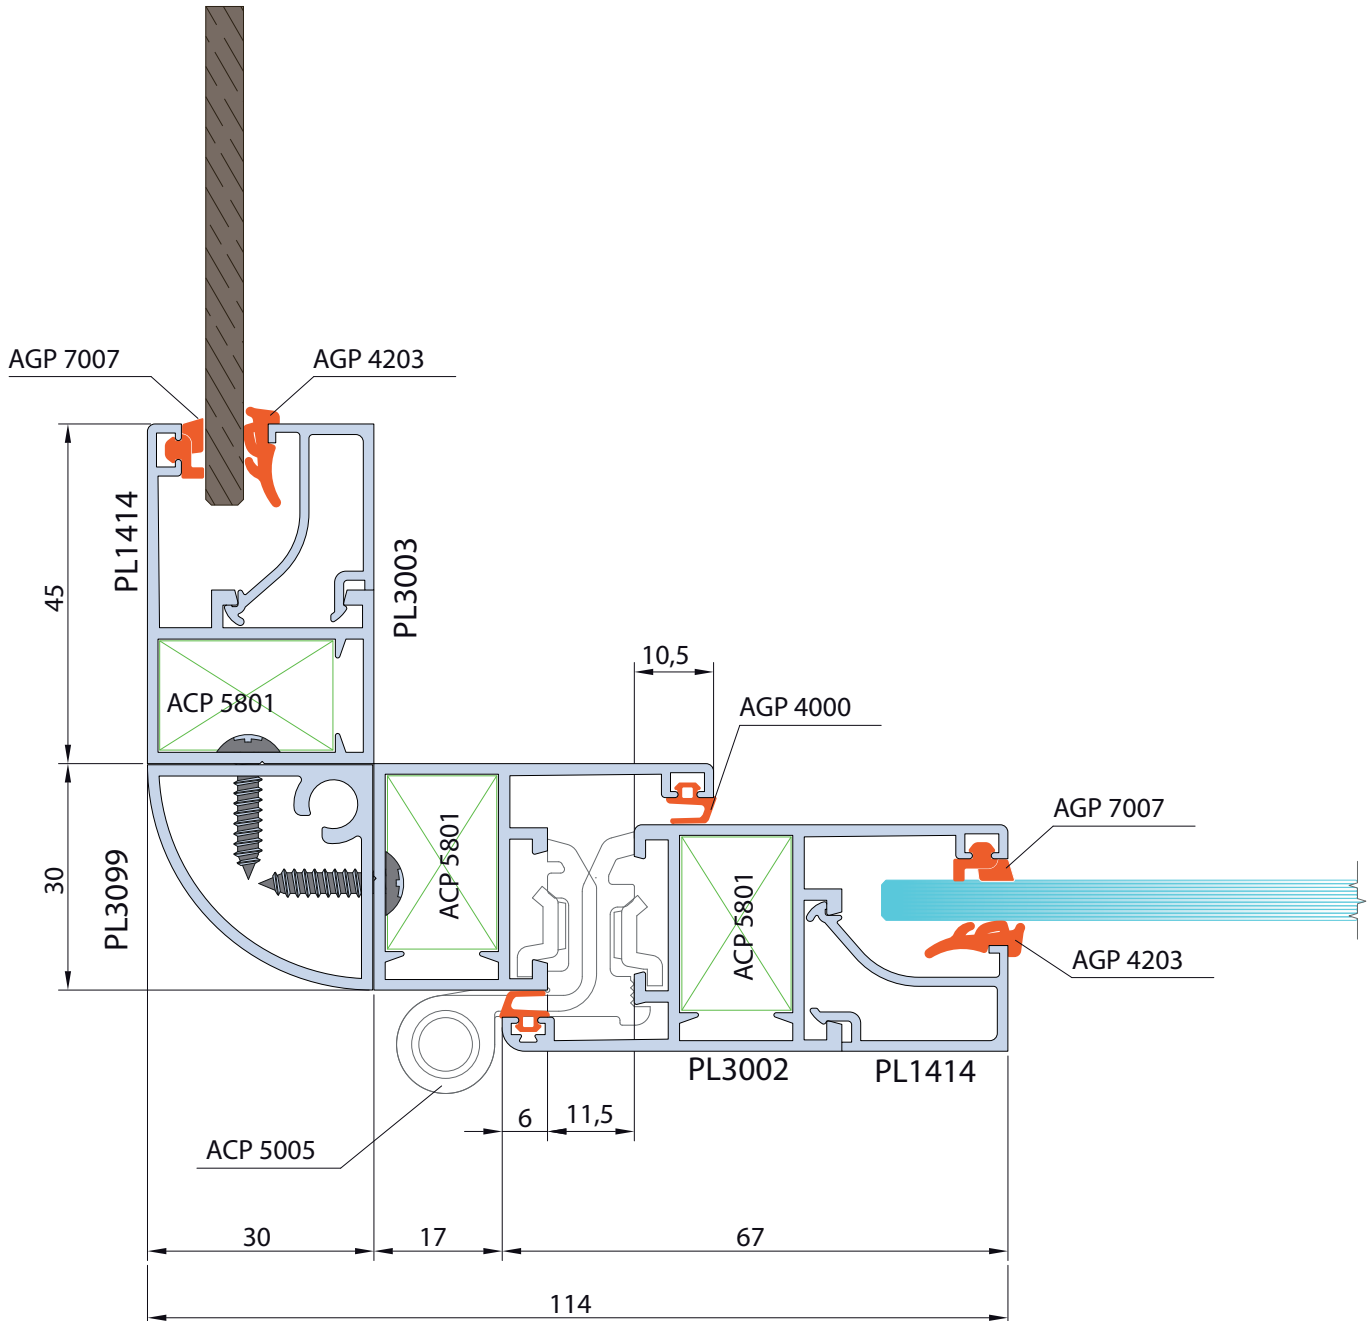

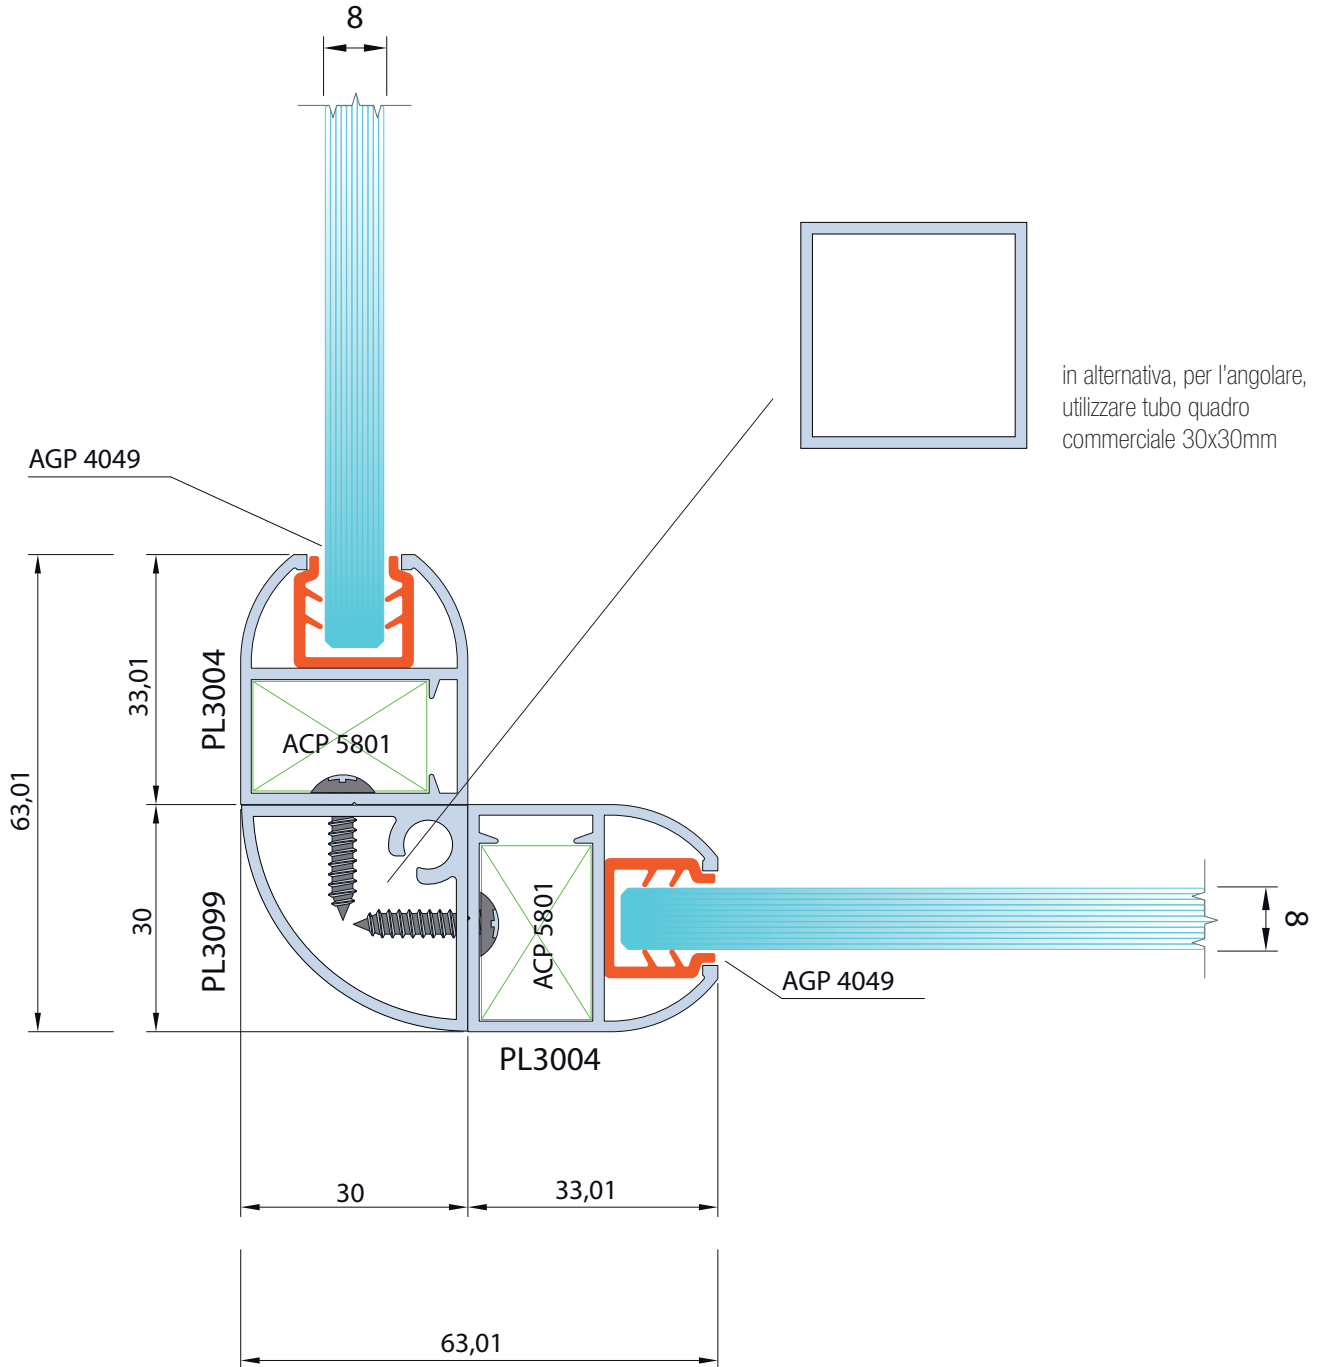

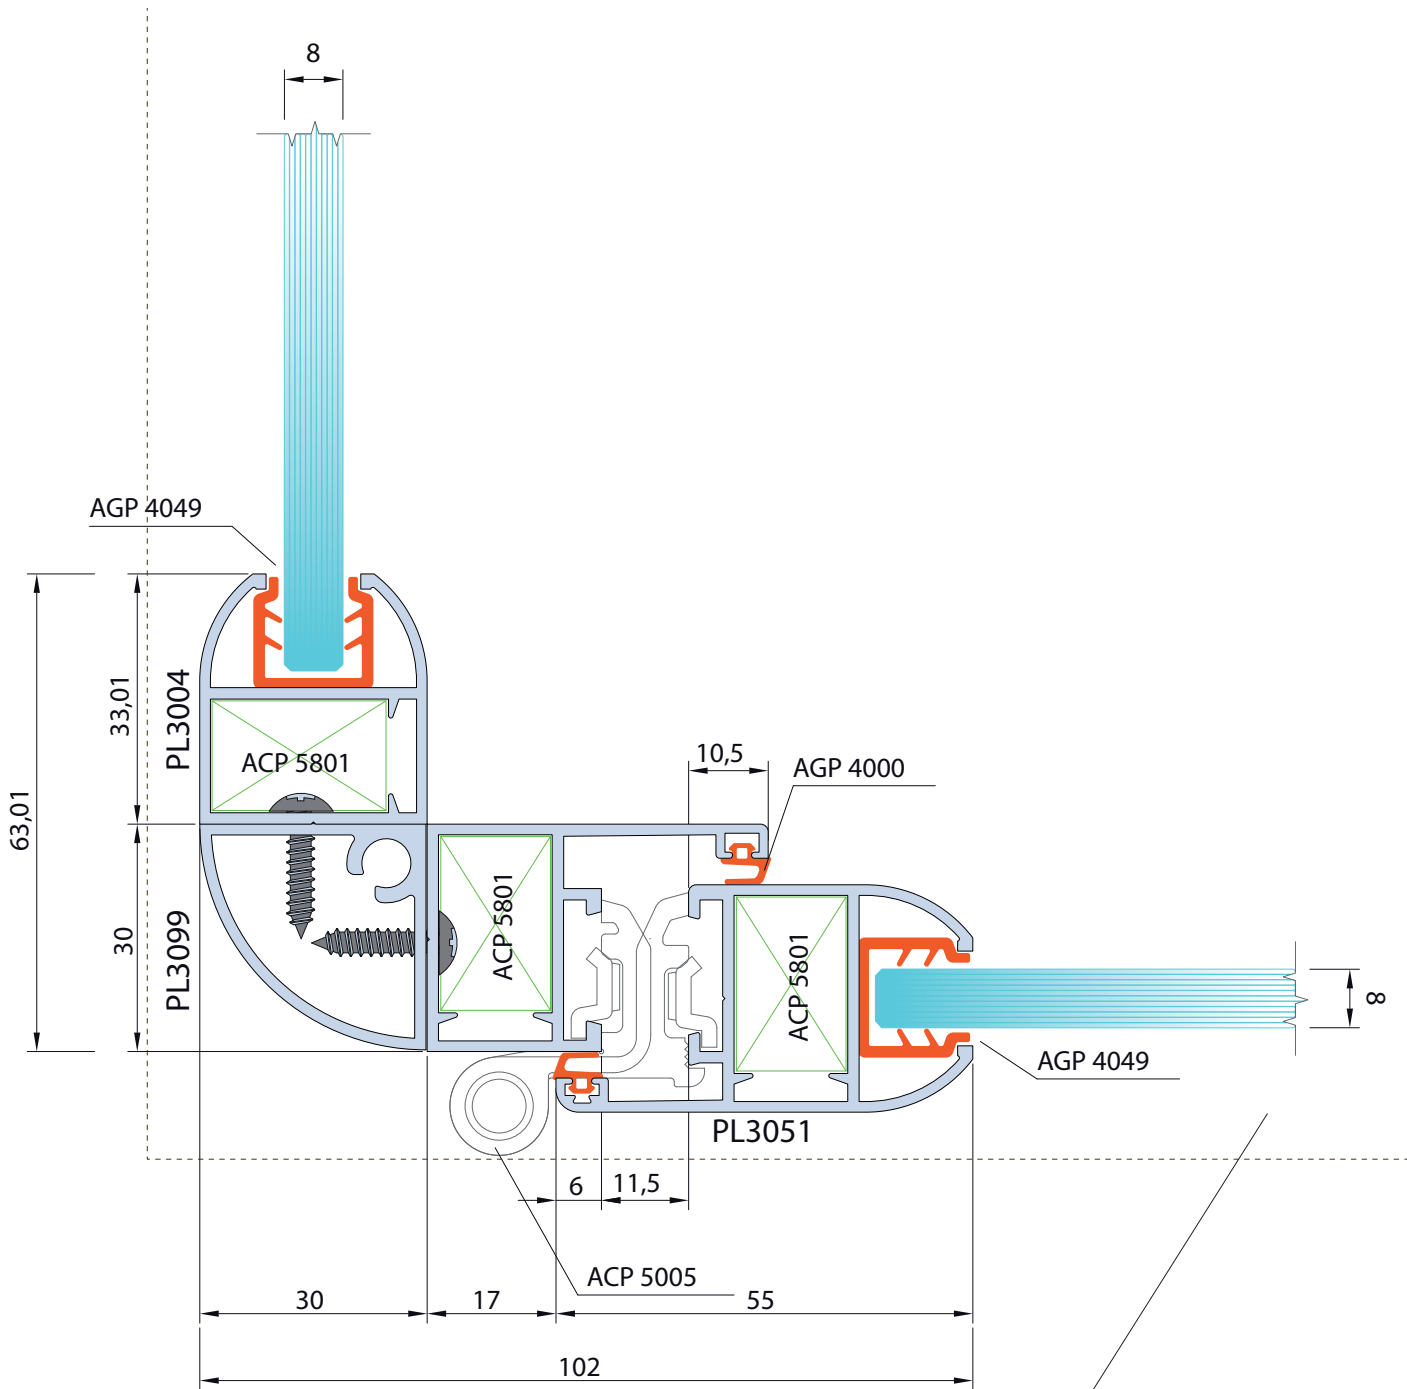

ACP 4038

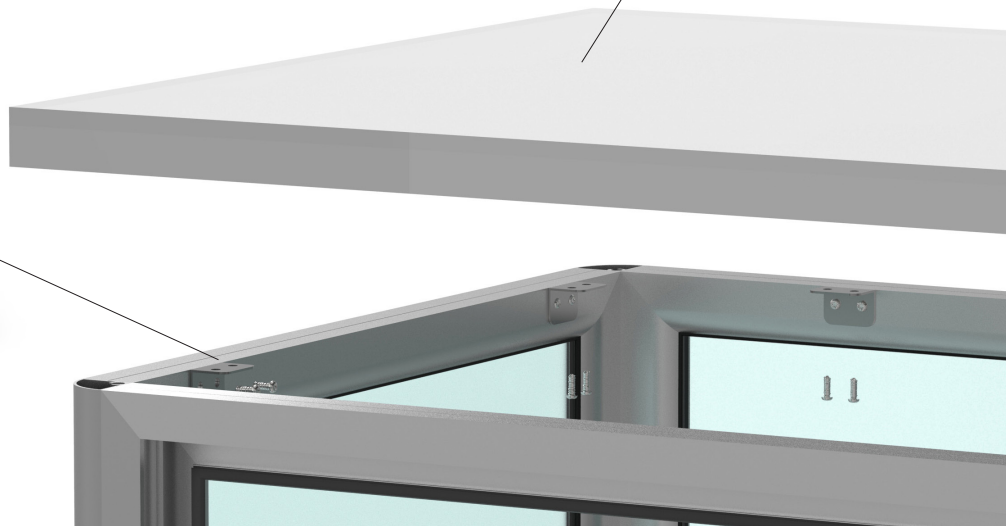

per applicare base, top e
ripiani del mobiletto,
utilizzare una staffa angolare
commerciale

CHIUSURE

Con la serie SMART30 si possono realizzare sportelli per chiudere locali contatori e vani in generale.

Si addice sia in un contesto industriale/ tecnico, che domestico, ad esempio per chiudere vani in muratura ad uso interno o esterno (cucine in muratura, zone barbecue...).

Si possono realizzare pannelli ciechi o vetrati di ogni spessore.

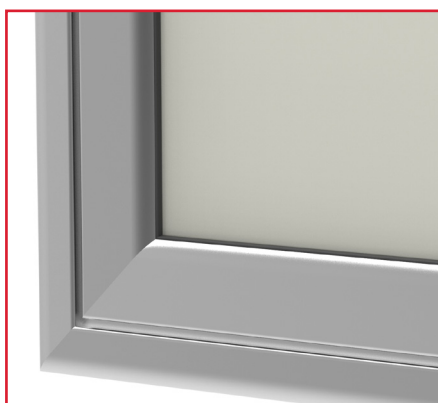

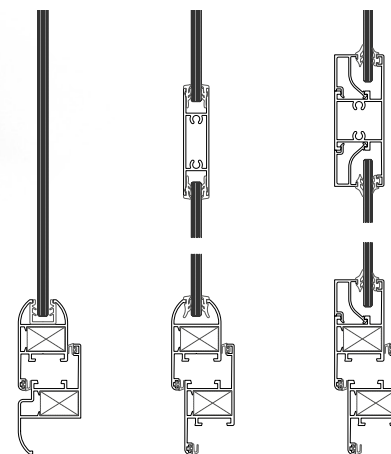

E' prevista la chiusura con chiave o con sistemi di libero accesso.

SMART30 serie can be used to close boiler rooms, counter rooms and empty space in general.

It is suitable for both in an industrial / technical, and in home spaces, for example, to close walling spaces for internal or external use (built-in kitchens, barbecue areas ...).

You can use solid or glazed panels of each thickness.

It can be closed with key or with an open access systems.

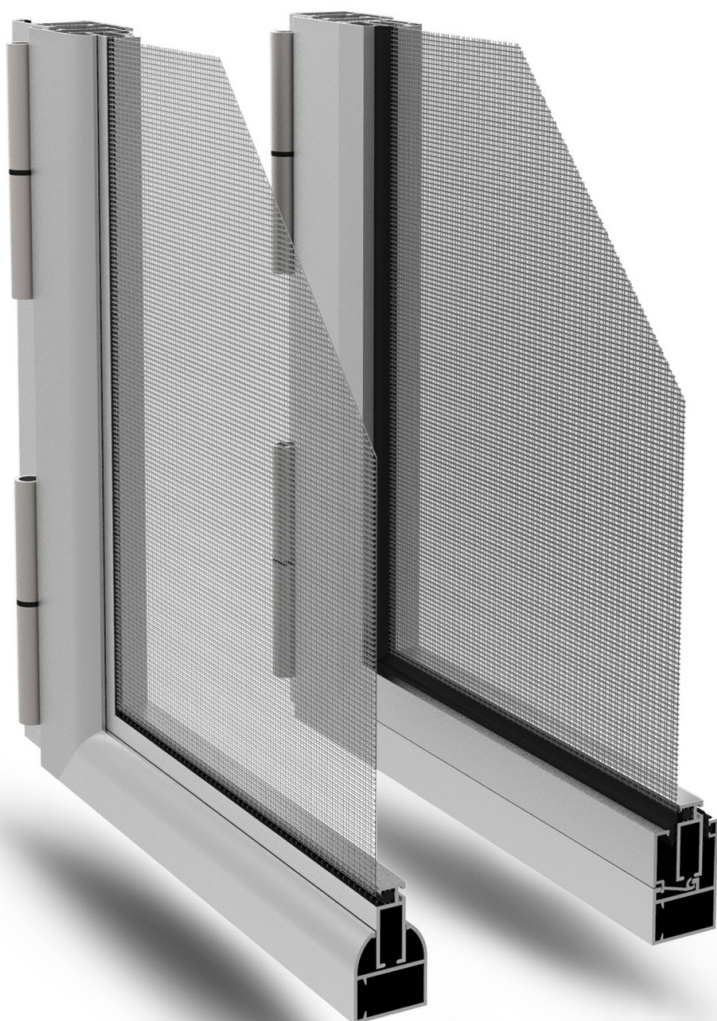

ZANZARIERE

Con la serie SMART30 si possono realizzare zanzariere all'americana (con apertura verso l'esterno) dotate di una certa robustezza.

Si può scegliere tra due profili zanzariera (da 30 o 50mm).

Pertanto si addice anche a realizzare porte balcone.

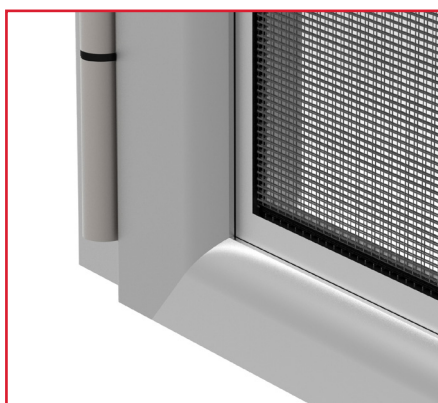

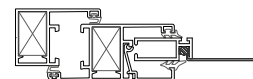

Per questa tipologia è stata pensata una chiusura magnetica, oppure si può utilizzare il chiudiporta a molla dedicato.

SMART30 serie can be used to make mosquito net (opening outwards) with good strength.

You can choose between two profiles mosquito net (30 or 50mm).

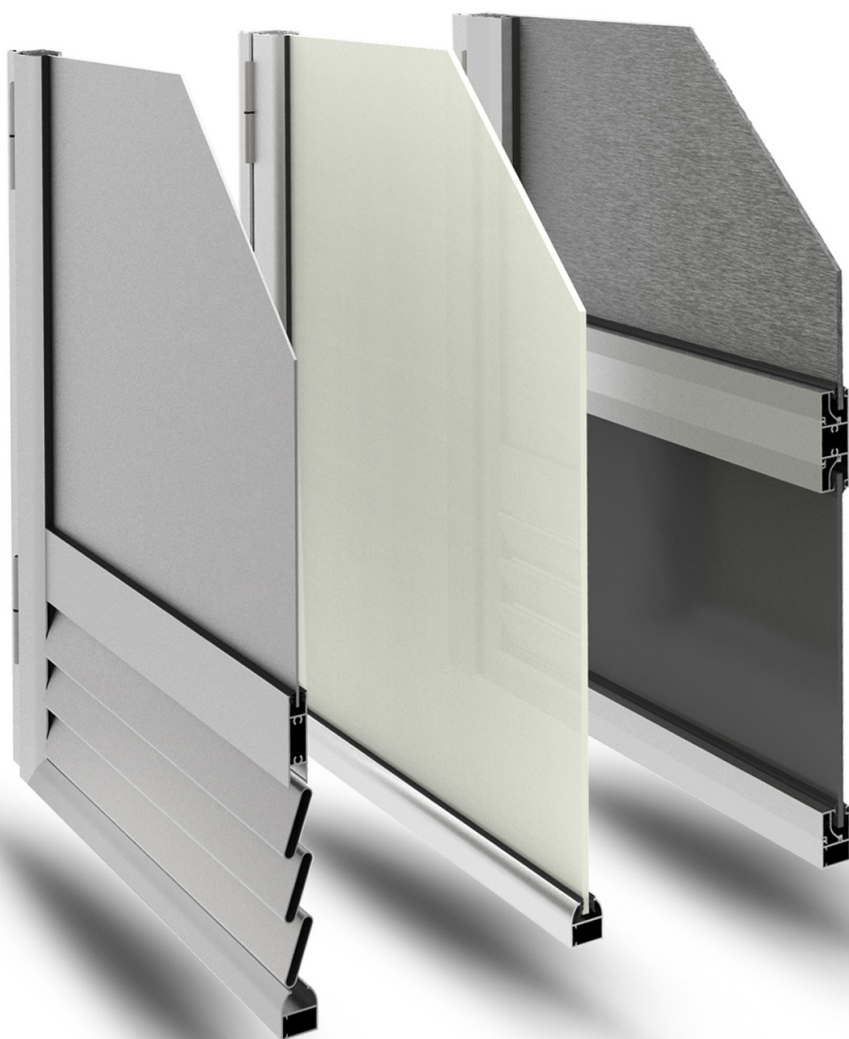

Therefore, it is also good to make balcony doors.

For this type has been designed a magnetic lock, or you can use the dedicated spring door closer.

PORTE DI SERVIZIO

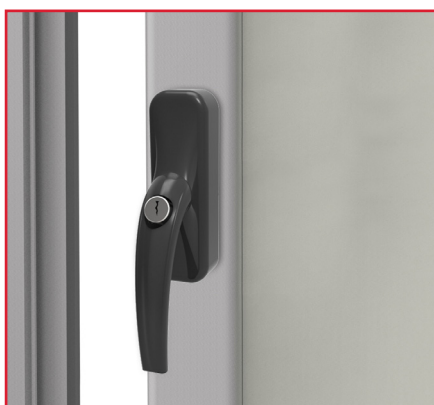

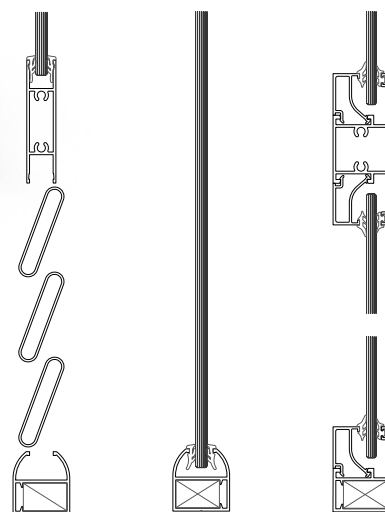

Con la serie SMART30 si possono realizzare chiusure per locali caldaia, garage, locali tecnici.

I profili infatti si prestano a realizzare porte di servizio, con la possibilità di inserire lamelle di aerazione o pannellature forate, interrompendo l'altezza, utilizzando gli appositi profili fascia (PL3052 o PL3038+fermavetro). Si possono utilizzare serrature o maniglie con chiave, oppure chiusure per il libero accesso (vedi cricchetto), a seconda del livello di sicurezza di cui si necessita.

SMART30 serie can be used to make closures for boiler rooms, garages, utility rooms.

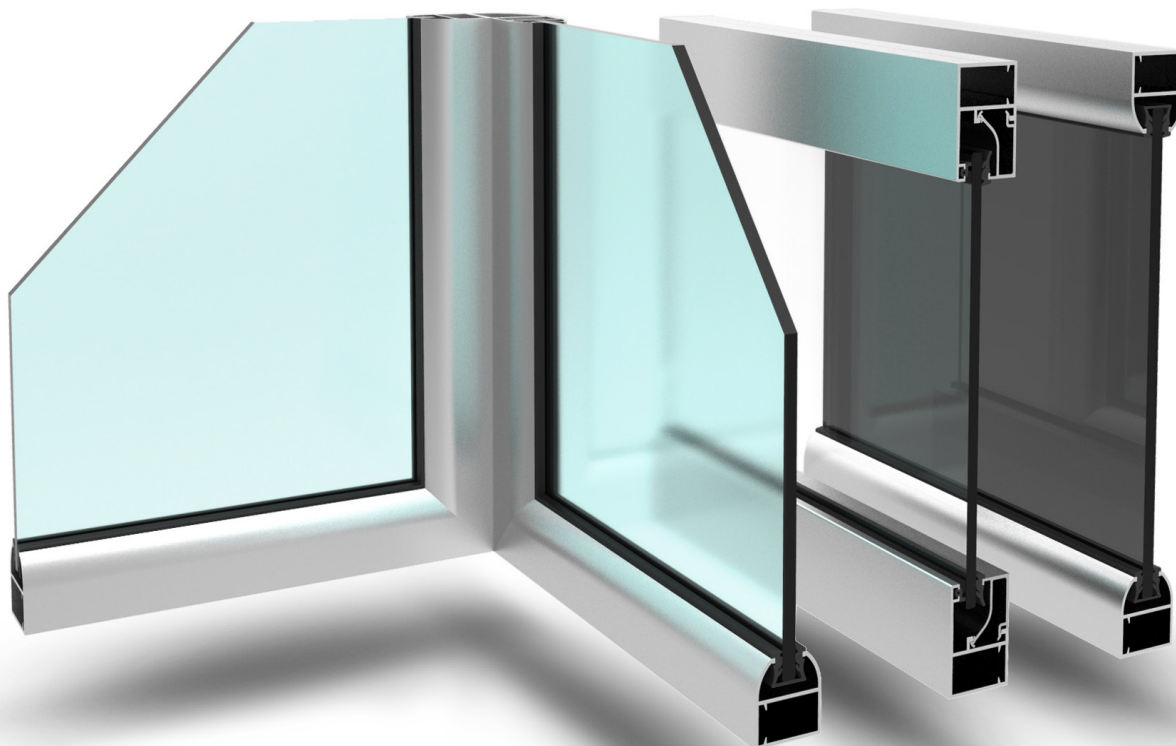

In fact its profiles lend themselves to achieve service ports, with the possibility to enter the ventilation slats or perforated panels, using the special band profiles (PL3052 and PL3038 + glazing bead).

You can use locks or handles with key or with free access, depending on the level of security that you need.

PARETI INTERNE

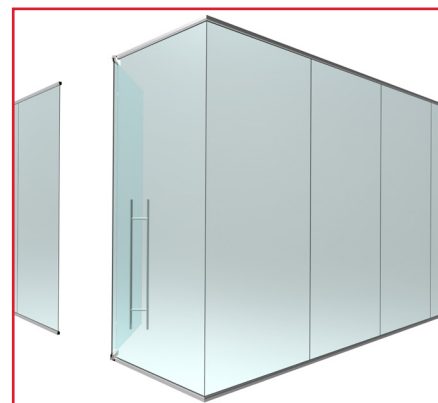

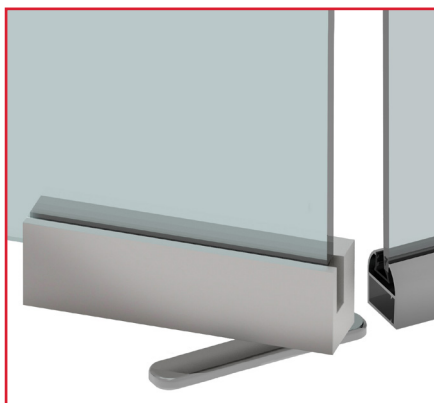

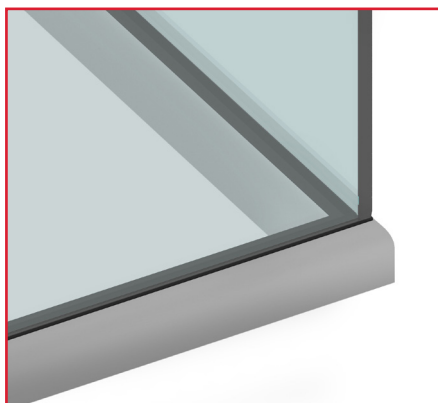

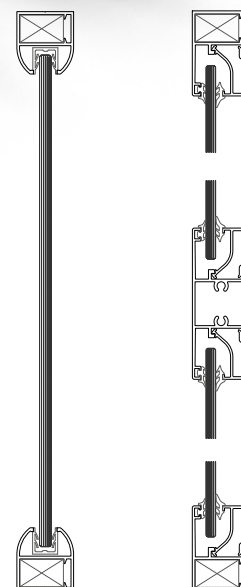

Con la serie SMART30 si possono realizzare anche pareti divisorie a tutto vetro, con la possibilità di inserire porte apribili, con chiudiporta a pavimento, totalmente vetrate. Se necessario, si può interrompere l'altezza con una fascia tagliavetro per variare la tipologia di pannello (intervallare zone opache e trasparenti).

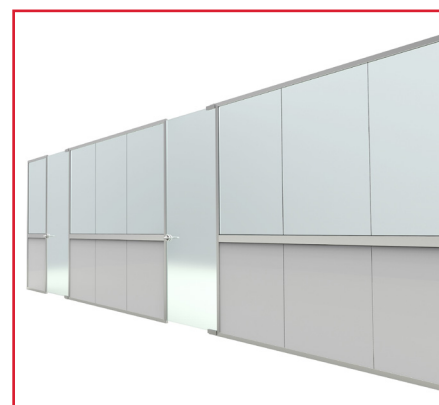

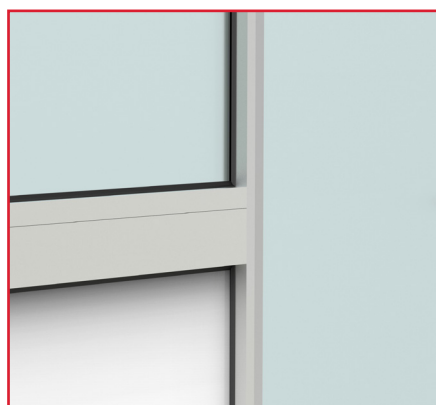

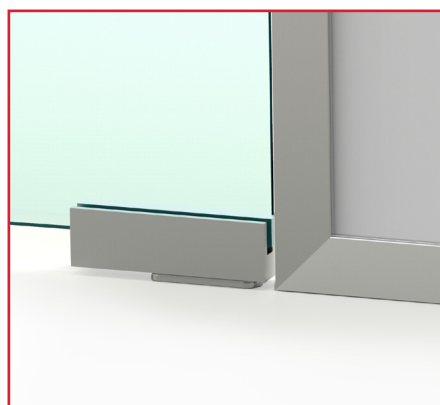

La mostra dell'alluminio va da un minimo di 30mm, a un massimo di 45mm, nella versione retta con fermavetro.

With the series SMART30 can be also realized glass dividing walls, with the possibility to insert totally glass doors.

If necessary, it may interrupt the height with a band for change the kind of panel (intersperse matt and transparent areas).

The aluminum show is from a minimum of 30mm to a maximum of 45mm for the square version.

MOBILETTI

Con la serie SMART30 si possono realizzare anche mobiletti e bacheche di varia forma e dimensione, con possibilità di interporre piani di diverso materiale e con diverse altezze.

Il mobiletto può essere raso terra, oppure rialzato, con l'utilizzo di piedini regolabili o di rotelle.

Si può predisporre una chiusura con serratura a camme, oppure utilizzare delle calamite dedicate.

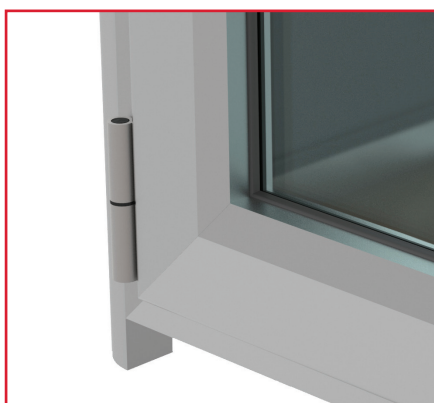

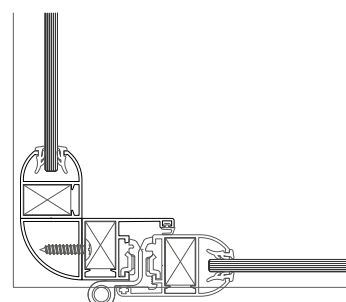

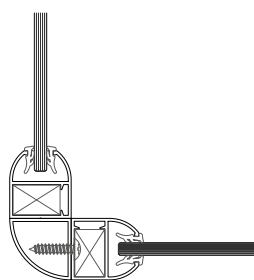

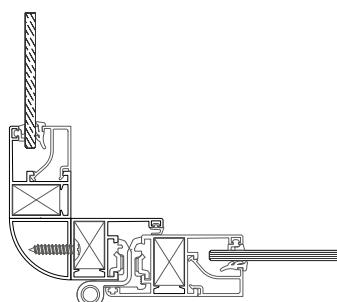

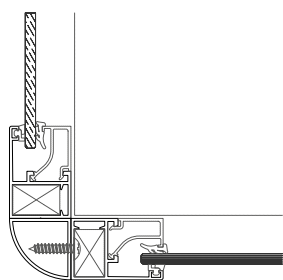

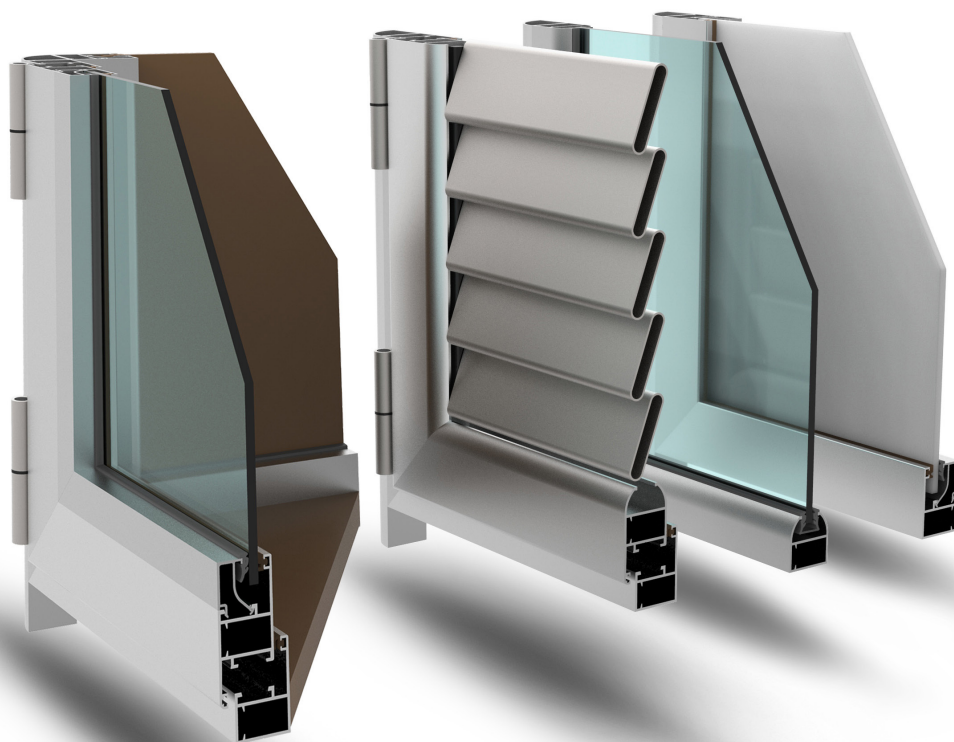

La serie è dotata di tutti gli accessori per l'apertura, quali maniglie e pomoli.

SMART30 serie can be used to realized cabinets and showcase of different size and shape, with the possibility to interposing plans of different material and different heights.

The cabinet can be at ground, or lift up, with the use of adjustable feet or casters.

You can use a closure with cam lock, or use magnets dedicated.

The series is completed with all the fittings for the opening, such as handles and knobs.

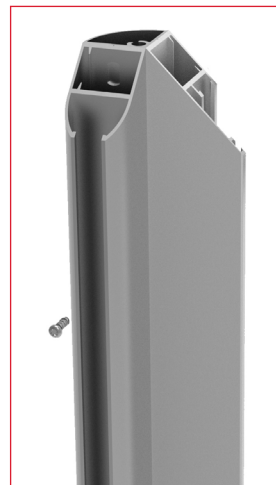

profilo anta

Montare i profili anta per 3 lati
con relative squadrette

PL 3099

Sistemi scorrevoli e alzanti

SLIDE **60**

Sistema non isolato, essenziale e funzionale. Con zanzariera prevista e integrata nel sistema

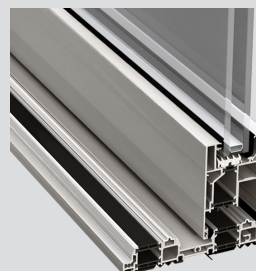

SLIDE **65**

Sistema a taglio termico essenziali e funzionali con zanzariera prevista e integrata al sistema

SLIDE **80/106** NEG **106**

Sistema a taglio termico rivoluzionario grazie agli eccellenti risultati termici ed acustici

TOP SLIDE **160**

Sistema a taglio termico per serramenti alzanti con portate fino a 400 kg, ed eccellenti prestazioni acustiche, termiche e ambientali

Sistemi scorrevoli e alzanti alluminio-legno

SLIDE WOOD **160**

Sistema a taglio termico alluminio-legno con valori eccellenti di trasmittanza termica, tenuta all'acqua, di portata e sicurezza all'effrazione

TOP SLIDE WOOD **214**

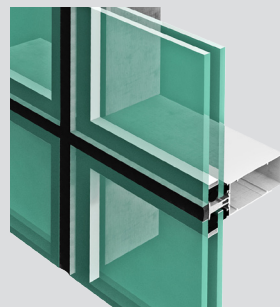

Sistema a taglio termico alluminio-legno per serramenti alzanti di elevate dimensioni e peso

Sistemi per facciate

SIRIO **50**

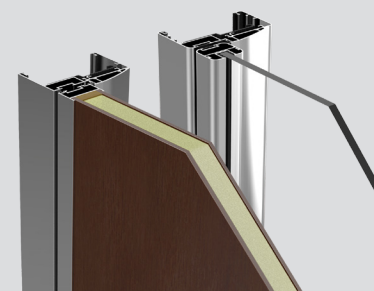

Sistema per facciate continue montanti e traversi

SIRIO **50 SG**

Sistema per facciate continue montanti e traversi con vetro strutturale

Sistemi per porte

EASY **DOOR**

Sistema per la costruzione di porte interne di alto design ad ante o porte scorrevoli di ogni tipologia, finitura estetica e colore

ELITE DOOR **72**

Sistema a taglio termico concepito per porte solide ed eleganti. Marcata CE con soglia calpestabile e maniglione antipanico per le vie di fuga
